ENVÍO DE PROPUESTAS DE PUBLICACIÓN:

Las propuestas de publicación han de ser remitidas (en archivo adjunto, con formato PDF) a alguna de las siguientes direcciones electrónicas: anabelen.martinez@uco.es, psgines@ugr.es

Antes de aceptar una obra para su publicación en la colección INTERLINGUA, ésta habrá de ser sometida a una revisión anónima por pares. Para llevarla a cabo se contará, inicialmente, con los miembros del comité científico asesor. En casos justificados, se acudirá a otros especialistas de reconocido prestigio en la materia objeto de consideración.

Los autores conocerán el resultado de la evaluación previa en un plazo no superior a 60 días. Una vez aceptada la obra para su publicación en INTERLINGUA (o integradas las modificaciones que se hiciesen constar en el resultado de la evaluación), habrán de dirigirse a la Editorial Comares para iniciar el proceso de edición.

Colección fundada por: Emilio Ortega Arjonilla y Pedro San Ginés Aguilar

Summary

INTRODUCTION	XI
1. AN ANALYSIS OF ELEMENTS AND INTERACTIONS IN THE TELL DOMAIN.	1
<i>Antonio Pareja-Lora</i>	
<i>Timothy Read</i>	
<i>Christina Drakidou</i>	
I. Introduction	2
II. Previous and related works	3
1. Prior research on TELL and its main subfields	3
2. The MOSL4L 1.0 framework.	6
3. Conclusions on previous and related work	7
III. Goals and methodology of this research.	9
IV. A fine-grained analysis of a sample of TELL papers.	9
1. Sample paper analysis	9
A. <i>MALL</i>	10
B. <i>LMOOCs</i>	11
C. <i>SOLL</i>	13
2. Identifying the elements present in TELL experiments	15
V. Conceptual analysis of the TELL domain	15
1. Conceptual modelling of the field in UML	16
2. Putting it all together: the MOSL4L 2.0 framework	20
VI. Evaluation and discussion	22
VII. Conclusions.	24
VIII. References.	25
2. CHATGPT FOR LANGUAGE LEARNING: TOWARDS AN APPROPRIATE USE OF OPEN AI.	27
<i>Alberto Andújar</i>	
I. Introduction	27
II. Artificial Intelligence and Language Learning.	29

POSITIVE IMPACTS OF MALL (MOBILE ASSISTED LANGUAGE LEARNING)

III. Artificial intelligence and mobile devices.	31
IV. Open AI: Chat GPT	33
V. Conclusion	36
VI. References.	37
3. INCLUSIVE SPACES: DEVELOPMENT OF MULTILINGUAL ENVIRONMENTS IN NATIVE COMMUNITIES IN LATIN LATIN AMERICA	41
<i>Mauro Marino-Jiménez</i>	
<i>Yolanda Julca-Estrada</i>	
I. Introduction	41
II. A success story	43
III. Systemic analysis of the Region	47
IV. Conclusions.	50
V. References.	51
4. THE USE OF DIGITAL TOOLS FOR EFL WRITING IN RURAL SCHOOLS: A CASE STUDY.	55
<i>Alejandro Curado Fuentes</i>	
I. Introduction	55
II. Theoretical Background: ICTs, Primary Education, and EFL in rural areas	57
III. Methodology: Participants and sessions	59
IV. Results.	64
1. Classroom observation	64
2. Written performance	65
3. Questionnaires and interviews	67
V. Conclusions.	71
VI. References.	72
5. THE STUDY OF EFL STUDENTS' SELF-REGULATION, LOCUS OF CONTROL, AND ACADEMIC ACHIEVEMENT THROUGH MOBILE-ASSISTED LANGUAGE LEARNING; THE CASE OF DUOLINGO® APP	75
<i>Mahdieh Fakhar Shahreza</i>	
<i>Elena Bárcena</i>	
<i>Reza Khany</i>	
I. Introduction.	76
II. Method	78
1. Procedure	78
2. Instrumentation	79
A. <i>Duolingo app</i>	79
B. <i>Spanish language proficiency test.</i>	79
C. <i>Self-regulation questionnaire</i>	79
D. <i>Locus of Control (LoC)</i>	79
3. Data Analysis.	80
III. Results.	81
1. First Research Question	81
2. Second Research Question.	82
3. Third Research Question	82
4. The Fourth Research Question	84
IV. Discussion.	84
V. Conclusions.	86
VI. References.	87

SUMMARY

6. MALL AND MEMES TO CONSOLIDATE GRAMMAR KNOWLEDGE: STUDENTS' PERCEPTIONS IN THE EFL UNIVERSITY CLASSROOM	93
<i>Neus Frigolé</i>	
<i>Ferran Gesa</i>	
<i>Maria-del-Mar Suárez</i>	
I. Literature review	94
II. Rationale and research questions	96
III. Methodology	97
1. Participants.	97
2. Instruments.	97
3. Procedure.	98
IV. Results.	100
V. Discussion and conclusions.	103
VI. References.	105
7. WHATSAPP, A MOBILE APPLICATION FOR SOCIAL LEARNING OF THE ITALIAN LANGUAGE THROUGH MICRO-TASKS	109
<i>María Gracia Moreno</i>	
<i>Monica Vilhelm</i>	
I. Whatsapp: a social application	111
II. The micro-task proposal	112
III. Results.	116
IV. Conclusions.	118
V. Bibliographic references.	119

Introduction

In an increasingly connected and constantly evolving world, language learning has undergone a significant transformation, driven by the unstoppable advance of mobile technologies. In this context emerges our monographic volume *“Positive Impacts of Mobile-Assisted Language Learning”*. It explores the paradigm shift driven by mobile technologies, which have transformed not only the way we learn languages, but also the way we conceptualize language education.

The rapid expansion of these mobile devices has resulted in ubiquitous language learning that goes beyond the traditional classroom, providing opportunities for self-directed and informal learning. The COVID-19 pandemic acted as a catalyst, accelerating the transition from face-to-face learning to emergency distance learning environments. As a consequence of this abrupt change, new challenges and opportunities arose, and language programs were forced to quickly adapt to this context.

This volume is presented as a response to the need to reflect and discuss these changes, exploring mobile technology-supported learning environments that could become the cornerstones of language education in the future. From theoretical analysis to experimental research, crucial issues such as the sociocultural impact of Mobile Assisted Language Learning (MALL), teachers’ perceptions, and emerging pedagogical implications are addressed.

Opening the dialogue, in the first chapter, Antonio Pareja-Lora, Timothy Read, and Christina Drakidou take a comprehensive look at experimental research in Technology Assisted Language Learning (TELL). They dive into MALL, LMOOCs, and SOLL, identifying elements and interactions that shape effective language learning scenarios. This analysis provides a robust framework, evolving from MOSL4L 1.0 to MOSL4L 2.0, codified in a rubric to facilitate language learning design.

At a time when Artificial Intelligence is constantly evolving, in the second chapter, Alberto Andujar highlights the impact of open Artificial Intelligence on

language learning. The opportunities and challenges of tools such as ChatGPT are examined, exploring how to properly integrate them in the classroom to enhance students' language proficiency.

Diving into the linguistic richness of Latin America, Mauro Marino-Jiménez and Yolanda Julca-Estrada address in the third chapter the loss of native languages due to migration and the influence of majority languages. They propose strategies to strengthen preservation programs such as Intercultural Bilingual Education and to promote multilingualism in public services.

Alejandro Curado, on the other hand, in chapter four explores the implementation of digital tools in the teaching of English as a foreign language in rural school environments. Through a case study in rural schools in Spain, he examines the advantages and disadvantages of integrating ICT into primary education.

The fifth chapter dives into a study focusing on the effectiveness of Duolingo® on the academic performance of Iranian students learning Spanish as a foreign language. Its authors, Mahdieh Fakhar Shahreza, Elena Bárcena and Reza Khany highlight the importance of self-regulation and locus of control, offering suggestions for optimizing the use of this application.

Continuing with educational innovation, in the sixth chapter Neus Frigolé, Ferran Gesa and Maria del Mar Suárez explore the convergence between mobile-assisted language learning and the use of memes to consolidate grammatical knowledge in the university classroom of English as a foreign language. The results highlight the positive reception of this experience, highlighting its fun and innovative character.

Concluding our tour, in the seventh chapter Maria Gracia Moreno and Monica Vilhelm reveal the results of an experimental study on the effectiveness of WhatsApp for Italian language learning. Highlighting the social character and versatility of WhatsApp, they explore written and oral microtasks to develop communicative competence in the Italian language, demonstrating its applicability in non-formal learning environments.

Throughout these pages, the reader will be immersed in the multidimensional world of technological mediation and discover how mobile technology can transform not only the way we learn and teach languages, but also the way we understand and relate to languages in a globalized context.

Together with an in-depth theoretical analysis, this volume presents a practical perspective, with experimental research exploring diverse application scenarios, methodologies, strategies, and crucial aspects such as motivation and learning self-regulation. Ultimately, this book invites a joint reflection on the current challenges and future possibilities of Mobile-Assisted Language Learning.

Mobile technologies enable ubiquitous language learning that complements traditional formal teaching environments. Their availability and functionality have promoted self-directed informal learning that helps optimise the time students are exposed to a foreign language.

The COVID-19 pandemic caused an abrupt shift from traditional in-person teaching environments to distance learning emergency scenarios. All key stakeholders in language programs were caught off guard and had to scramble to find resources and solutions. At the same time, this situation created opportunities for innovation and transformation in language learning and teaching that could remain and be prolonged once critically reviewed. Within this framework, this volume aims to present different learning environments supported by mobile technology, which could become new opportunities to engage in language learning. This mediating role of mobile technology could help move from isolated personal learning to new learning scenarios whose effectiveness is worth analyzing.

This volume aims to reflect on the current challenges in mobile-assisted language learning (MALL), the multidimensional character of technological mediation, the sociocultural impact of MALL, teacher perceptions of the implementation of MALL practices and pedagogical implications derived from them. This reflection is carried out through the theoretical analysis of the research that has been carried out on technology-enhanced language learning (TELL) in general, and MALL in particular, to identify the elements and advantages that contribute to their effectiveness. And it is complemented with practice through several experimental investigations in MALL that delve into the different application scenarios, diverse methodologies and strategies, as well as some crucial aspects in learning such as motivation, student commitment and learning self-regulation considering their environment: migration, minority communities or rural areas.
